Stream Usage Survey

1. Stream Name (Please enter the full name)
2. County (Please enter the county or counties where the use occurs)
3. City or Town (Please enter city or town closest to the area of use)
4. Where do you use the stream? If use occurs in multiple locations, please list them all below. (Please be specific so the location can be identified on a map, e.g., 9th Street Bridge, Anytown City Park, Quarter Section-Township-Range, Latitude/Longitude, etc).
5. Have you or your family personally used the stream at this site(s) for recreation since Nov. 28, 1975?
☒ Yes If Yes, go to Question #6 ☐ No If No, go to Question #11
6. Have you or your family personally used the stream at this site(s) for any of the following whole body contact recreation activities? Please select all that apply:
☒ Swimming ☐ Tubing ☐ Snorkling/Skin Diving ☐ Water Skiing
7. How many times per year have you or your family personally used the stream for these activities?
8. Have you or your family personally used the stream at this site(s) for any of the following secondary contact recreation activities? Please select all that apply:
☐ Fishing ☒ Wading ☐ Boating ☐ Trapping
9. How many times per year have you or your family personally used the stream for these activities?
10. How many of these times did children wade or play in the stream?
11. Have you observed or heard of others using the stream at this site(s) for recreation since Nov. 28, 1975?
☒ Yes If Yes, go to Question #12 ☐ No If No, go to Question #17
12. Have you observed or heard of others using the stream at this site(s) for any of the following whole body contact recreation activities? Please select all that apply:
☒ Swimming ☐ Tubing ☐ Snorkling/Skin Diving ☐ Water Skiing
13. How many times per year have you observed or heard of others using the stream for these activities?
14. Have you observed or heard of others using the stream at this site(s) for any of the following secondary contact recreation activities? Please select all that apply:
☐ Fishing ☒ Wading ☐ Boating ☐ Trapping
15. How many times per year have you observed or heard of others using the stream for these activities?
16. How many of these times did you observe or hear of children wading or playing in the stream?
17. Do you have additional comments you would like to provide the department regarding this stream?

When I was a child between the ages of 9 to 16, my friends (of the same age) and I used Deer Creek for swimming, and playing very frequently. We played with toys boats, and skipped stones. We spent much of our summers swimming and playing in Deer Creek.

18. In the event the department has questions, please provide the following contact information:

observing ducks, turtles, muskrat, herons; skipping stones

sons used to wade out to a higher bit of ground in the creek which they called "Sea Glass Island." We also use the stretch that is between Twin Springs Lane and the Ladue City mulch site. That is where we picnic on what we call "The Flat Rocks." The beaver dam was upstream from the bridge on Log Cabin Lane, south of Highway 40, and downstream from the Ladue City Mulch site. We used to see the turtles at "Owyn's Lookout," which is upstream from beaver dam and downstream and just around the bend from the mulch site.

AdditionalComments:	<p>Over the past year and a half, I have been in the stream under a variety of conditions, including several weeks of dry summer weather. At a minimum, there are always pools in the creek at all sites indicated above.</p> <p>This stream is unique - I have seen continuous flow upstream at Ladue High School while downstream at Litzinger Road Ecology Center, there is no flow (but sizeable pools) and the USGS gage shows no flow for the previous week or more. I believe that this stream should be reclassified and a study done of where the water goes (shallow subsurface flow vs. losing stream), as this stream receives CSO/SSO discharges.</p>

17. Do you have additional comments you would like to provide the department regarding this stream?

Just have seen evidence of others being at the stream bed area. Did see a man and his dog walking there, and have seen horseback riders on the trail nearby. My hope is that all point source pollution will be restricted and enforced. Thank you for opening this up for comment and for the open forum presented.

Subject Use Attainability in St. Louis Area Streams

Dear John and Members of the Clean Water Commission

I won't be able to attend the public meeting in St. Louis tomorrow evening, but I want to comment on stream protection.

There are a number of streams in St. Louis that should be protected for whole body contact and for wading and splashing.

I live in Webster Groves and there are often children playing in Shady Creek that runs along Lockwood Road--- it adjoins properties there and goes through some parks

Also a branch of Shady creek that flows through the Algonquin Golf Course then travels through Larson Park and it the site of many children's adventures in the natural world. You can find trails to the creek along its channel. It is shallow, but kids play there regularly.

As these streams merge and go on down stream toward Deer Creek there are other access points where neighborhood children play.

Deer Creek in its entire length should be a wade -able and swim- able stream... Friends who grew up on the stream used to fish, swim and even canoe it in high water. There is a great swimming hole that people do not use today because the stream is too dirty, but it would be used every day in the summer, because it is plenty deep, more than 6 feet deep and probably twenty feet in diameter, but we cannot use it until the river is cleaned up. You can find the trails that go down the the creek in numerous places, including near the Bi-State Bus Depot at Brentwood Blvd.

I bike along Grants Trail and see people playing in Gravois Creek on a regular basis. There are a number of parks that come into the creek, and children and dogs are often wading in the creek. This is in spite of the fact we know it is not clean... if it were cleaned up we would have lots more people enjoying that stream, especially because it does border the trail and is very easy to access.

I used to live in University City and North River Des Peres, which flows in Ruth Park and then down to Heman Park is also a play area for children, especially those whose homes back to the creek. This area should be protected for wading. I think now there are sewer overflows in the stream corridor.

Thanks for including these comments in your documents.

David A. Wilson 322 Camellia Drive, St. Louis, MO 63119

Recreational Use of Your Stream

AdditionalComments:	<p>On August 16th, 2008 8 female staff from Webster University Center canoed a 1/8 mile section of Deer Creek, putting in at CSO # L105 below and on the eastern side of the Laclede Station Rd Bridge east of Deer Creek Park.</p> <p>We were participating in a Missouri Stream Team cleanup, and a boat-based approach seemed a safer logical course since the nearby Combined Sewer Outlet was flowing copiously, and we were trying to minimize human exposure. Canoeing was a small struggle due to frequent rocks, but there was sufficient depth for draft of the boats that this team cleaned for 2.5 hours and returned with full loads.</p>

Stream Usage Survey

1. Stream Name (Please enter the full name)
2. County (Please enter the county or counties where the use occurs)
3. City or Town (Please enter city or town closest to the area of use)
4. Where do you use the stream? If use occurs in multiple locations, please list them all below. (Please be specific so the location can be identified on a map, e.g., 9th Street Bridge, Anytown City Park, Quarter Section-Township-Range, Latitude/Longitude, etc).
-
5. Have you or your family personally used the stream at this site(s) for recreation since Nov. 28, 1975?
- ☒ Yes If Yes, go to Question #6 ☐ No If No, go to Question #11
6. Have you or your family personally used the stream at this site(s) for any of the following whole body contact recreation activities? Please select all that apply:
- ☐ Swimming ☐ Tubing ☐ Snorkling/Skin Diving ☐ Water Skiing
7. How many times per year have you or your family personally used the stream for these activities?
8. Have you or your family personally used the stream at this site(s) for any of the following secondary contact recreation activities? Please select all that apply:
- ☒ Fishing ☒ Wading ☐ Boating ☐ Trapping
9. How many times per year have you or your family personally used the stream for these activities?
10. How many of these times did children wade or play in the stream?
11. Have you observed or heard of others using the stream at this site(s) for recreation since Nov. 28, 1975?
- ☒ Yes If Yes, go to Question #12 ☐ No If No, go to Question #17
12. Have you observed or heard of others using the stream at this site(s) for any of the following whole body contact recreation activities? Please select all that apply:
- ☐ Swimming ☐ Tubing ☐ Snorkling/Skin Diving ☐ Water Skiing
13. How many times per year have you observed or heard of others using the stream for these activities?
14. Have you observed or heard of others using the stream at this site(s) for any of the following secondary contact recreation activities? Please select all that apply:
- ☒ Fishing ☒ Wading ☐ Boating ☐ Trapping
15. How many times per year have you observed or heard of others using the stream for these activities?
16. How many of these times did you observe or hear of children wading or playing in the stream?
17. Do you have additional comments you would like to provide the department regarding this stream?

Stretches of Deer Creek at the Litzsinger Road Ecology Center:

-supports aquatic life (we have at least 6 different species of fish that have been sampled along LREC's reach, as well as over four years of macroinvertebrate data, plus all of the wildlife sightings that are dependant upon Deer

18. In the event the department has questions, please provide the following contact information:

AdditionalComments:	<p>Stretches of Deer Creek at the Litzsinger Road Ecology Center :</p> <p>-supports aquatic life (we have at least 6 different species of fish that have been sampled along LREC's reach, as well as over four years of macroinvertebrate data , plus all of the wildlife sightings that are dependant upon Deer Creek like turtles, frogs, kingfisher, mink, beaver, muskrat, snakes, etc.)</p> <p>-maintains stretches where the water is more then a meter deep in the dry times of the year (we have at least three larger pools that maintain this status throughout the year)</p> <p>-the stream is used on a regular basis and humans, particularly children, readily come into contact with it. We do this all the time through our stream education and water monitoring efforts. Whether it is wading in the creek for stream mapping, macroinvertebrate sampling, water chemistry, stream clean-ups or student explorations, humans frequently come into contact with the water of Deer Creek .</p>
